Norwex[®]

Sometimes the smallest things have the biggest impact.

It all began in Eidsvoll, Norway, in 1994 with a little red microfiber cloth and some bugs on a windshield. The cloth's ability to get that windshield clean without chemicals sparked a vision in Founder Bjørn Nicolaisen, and Norwex was brought to life.

Over the last two decades, millions of Customers have embraced cleaning with only Norwex Microfiber and water. It's less expensive, saves time and reduces harmful chemicals in the home. We're now creating healthier, safer havens that are more sustainable than ever—which goes hand in hand with our global Mission.

Our Global Mission
Improving quality of life
by radically reducing chemicals
in our homes.

At Norwex, our environmentally friendly products are just a start.

As the population increases, environmental pollution and chemicals are also on the rise.

- Only about 5% of the plastic we use is recycled.
- Plastic pollution covers an area equal to 88% of our oceans' surfaces.
- 24% of human disease has been linked in part to environmental factors.
- About 80,000 new chemicals have been introduced into the environment in the last 50 years. Sadly, only about 200 of these have ever been assessed for their impact on human health.

At Norwex, we are optimists.

If many people make a few simple changes, we can have a profound impact. That's why Norwex is passionate about sustainability and shedding light on the harmful effects of chemicals in our bodies as well as our planet. Our intentions for the future are to go even further and to do even more:

- To create millions of safe havens at home and around the globe.
- To raise awareness and educate about chemicals and our environmental challenges.
- To ask everyone to make small, conscious choices to improve our planet.

Together, we can make a difference!

NORWEX MICROFIBER CLEANS WITHOUT CHEMICALS

At 1/200th the size of a human hair, Norwex Microfiber is one of the most innovative products in the cleaning industry today.

- Lifts dirt, grease and grime up into the cloth and off the surface.
- BacLock™*, the micro silver agent in the wet cloth, goes to work using its self-purification properties against mold, fungi and bacterial odor within 24 hours.
- Using just water, surfaces are left free from **everything**—cleaned, polished and streak-free.

Use It Dry to Dust

Used dry, Norwex Microfiber is a superior duster, holding the smallest particles in its fibers, creating a cleaner surface that lasts longer with no harmful chemical residue to collect more dust.

Use It Wet to Clean

Used wet, Norwex Microfiber loosens and lifts the most stubborn dirt and debris up into the cloth and away from the surface. Simply wet thoroughly, wring well, fold flat and wipe away grime from all washable surfaces.

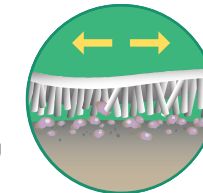

For best cleaning results, Norwex Microfiber should be machine-dried after laundering with Ultra Power Plus™ Laundry Detergent.

All Norwex Microfiber products carry a two-year warranty. Please visit www.norwex.com for complete details.

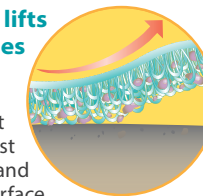

How Norwex Microfiber Works vs. Cotton

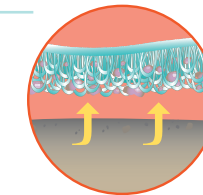

Traditional cotton cloth pushes around particles, spreading dirt, grime and moisture into the surface crevices, leaving it moist and unclean.

Norwex Microfiber lifts and collects particles Used dry, Norwex Microfibers produce an electrostatic charge that attracts even the smallest particles of dirt, grease and moisture, leaving the surface free from everything.

Norwex Microfiber self-purifies Used wet, the micro silver in the cloth goes to work with self-purification properties.

*This graphic is noted throughout the catalog to differentiate those products that contain an antibacterial agent for self-cleaning purposes only. The agent is solely designed to inhibit bacterial odor, mold and/or mildew growth within the product.

“It’s simple: I LOVE my Silver Care Toothbrush! At my parties, I put on my dental hygienist hat for a few minutes to educate the guests about toothbrushes and bacteria in relation to their oral health. I share my Customers’ testimonials of how their dental hygienists are impressed with the improvement of their gums’ health to the point that they ask them if they started flossing! Nope, it’s simply the silver soldiers in the disposable head!”
